LETTER OF RECOMMENDATION

To Whom It May Concern,

I am writing this letter in strong support of **Amit Vishnu Bhise** for admission to a Doctoral (PhD) program.

As Executive President and Vice-Chancellor of MIT ADT University, I have had the opportunity to observe Amit's academic orientation and research intent over a sustained period. Amit demonstrates a clear inclination toward advanced inquiry, particularly in domains that demand mathematical reasoning, analytical depth, and the translation of theory into real-world systems.

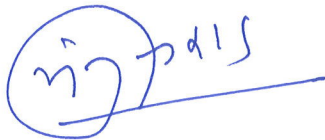

What distinguishes Amit is a research mindset aligned with doctoral-level expectations: the ability to frame problems rigorously, question assumptions, and pursue structured exploration rather than superficial solutions. Amit has shown the intellectual independence, persistence, and conceptual clarity that are essential for long-horizon research work typical of PhD programs.

Amit's interest in research-driven problem solving—spanning theoretical foundations and applied innovation—suggests strong potential for original contribution. The discipline with which Amit approaches complex topics, combined with professional maturity, positions them well to operate effectively within a supervised yet self-directed research environment.

Based on my assessment, I am confident that Amit possesses the academic seriousness, ethical grounding, and intellectual capacity required for successful doctoral research. I recommend Amit without reservation for PhD studies and believe they will contribute meaningfully to the research culture of the host institution.

Please feel free to contact my office should further information be required.

Yours sincerely,

Mangesh Karad
Pro-Chancellor
